

## **Measures to manage DoLS authorisations during Covid -19**

The following measures are proposed instead of face to face visits to ensure protection for those most at risk of Human Rights breaches, to maximise the Councils capacity to promote and safeguard the well-being of those who may be subject to a deprivation of liberty and to manage the potential spread of Covid -19

### **General points**

Most/all care homes are likely to be implementing additional restrictions during this time. Many of these do **not** relate to deprivation of liberty due to unsoundness of mind but rather relate to preventing the spread of infectious diseases. We await clear guidance on the position for those who need to be isolated/restricted on this basis and how to protect their article 5 rights beyond the protection offered by DoLS.

Schedule A1 Mental Capacity Act describes how a best interests assessment is carried out.

The assessor must consult the managing authority of the relevant hospital or care home.

The assessor must have regard to all of the following—

- (a) the conclusions of the mental health
- (b) any relevant needs assessment;
- (c) any relevant care plan.

There is no requirement for face to face assessment or even for consultation with P.

This is much more difficult with capacity and mental health assessments; hence the following measures seek pragmatic ways to provide such assessments.

Appeal to the Court of Protection is still available for people once an authorisation is issued, this is not available without an authorisation in force.

Consideration may need to be given for casual staff to have look up access to Liquid Logic if they are utilised during this period to allow them to carry out the checks referred to below.

**It must be noted that these measures will ensure some degree of business continuity, but Public Health measures may make it impossible to complete many of the requests for DoLS Authorisations.**

### **Form 1s – new applications**

Screen as usual for priority

### **Urgent cases**

1. If the situation is urgent DoLS Team Manager to consider whether a visit is possible or even an option.
2. If it is possible the first approach is to require the s12 doctor to visit and complete MHA and MCA. This limits the number of professionals visiting and the BIA will complete the rest of the assessments by phone interviews.
3. If significant restriction or objection is indicated, the BIA may need to visit to assess further; however, in such cases it is preferable to consider shorter authorisation periods with a

reassessment planned later, or a longer authorisation period but with a review planned e.g. within 2-3 months.

### **If no visit is possible**

1. Can the MHA be completed from existing notes?
2. Is there a capacity assessment for the same or similar decision with adequate evidence to rely on, which can be utilised by the BIA?
3. Is the person nonverbal rendering it likely that capacity is lacking on this basis alone?
4. Is there evidence from other sources and previous assessments rendering it likely that capacity is lacking for most decisions other than day to day. Can this evidence be used?
5. If a capacity assessment can be completed by any of the above methods, then the remaining assessments to be completed by phone

### **Non-Urgent Form 1s**

1. Screen for existing evidence.
2. Is communication nil and has capacity previously been assessed on more than one occasion with a lack of capacity evidenced through minimal to no communication.
3. Can you use this evidence to complete a valid capacity assessment, in conjunction with the social worker or person who knows P well?
4. There may be a recent capacity assessment e.g. for admission to care home but completed by social worker. Can the BIA verify details and use this as evidence for their own capacity assessment making it clear it is drawn from evidence from others due to not being able to visit.
5. If so, then proceed to do Best Interests by phone and speaking to relatives.
6. BIAs/Admin should record which care homes are preventing access and update their assessments with details of additional restrictions such as lack of access, visitor restrictions etc
7. BIAs can still commence new assessments by phone to care homes and families, identify specific restrictions and any particular issues, and complete as far as possible. These can be finalised with capacity assessments once visits are allowed again. In this way partial assessments can be completed in bulk by care home. To be finalised later.

### **Form 2s -Renewals**

1. Screen for all up and coming renewals with capacity assessments in date
2. Use these along with MHA completed from previous assessment and do Best Interests by phone
3. Where visits are still allowed/advised s12 doctors to be required to complete mental capacity assessments, as well as MHA
4. Recently expired capacity assessments where the BIA confirms with the care home and the RPR that there is no change, could be used by the BIA repeating the information and updating with their phone call to verify nothing has changed. Don't forget there will be no time limit of use of assessments under LPS
5. In renewal cases where there has been some significant change, such as increase in dependency/restrictions, BIAs can still complete renewal assessments by phone, but if there is significant new information complete a Form 3 explaining in the recording the circumstances which prevented a visit.
6. If there is objection – either new or more markedly than previously - then BIAs may need to highlight the strength of objection and consider advising on an application to the Court of

Protection at the earliest opportunity. BIAs must still apply the guidance on where an appeal is required.

### **Renewals where the Form 2 is not received in time**

1. A short window (up to two weeks) could be allowed whereby an expired authorisation can still be treated as a renewal even though they have expired. Perhaps consider whether Form 9 is appropriate in these circumstances.
2. Generating Form 2s on time is useful for everyone in the current situation. Where a Form 2 is not received the BIA can still commence the renewal and ask for the Form two when they phone to begin assessing.

### **Summary**

During this challenging time a pragmatic approach must be taken to ensure vulnerable people receive appropriate legal protection.

Locating capacity assessments which are still in time is key and can be carried out by admin

Locating renewals in time also can be supported by admin

Using a combination of the above measures will ensure the Council continues to meet its legal requirements.

BIAs and Authorisers should record some form of words to clarify how the assessments were completed. The following is suggested<sup>1</sup>

For the BIA report:

“This assessment occurred at a time when public health measures had been put in place by HM Government to contain the spread of the COVID-19 virus. Professionals were being advised only to carry out essential visits to care homes.

When completing this assessment, I had to balance the need to protect X’s Article 5 rights against the need to protect him/her from transmission of the virus. COVID-19 infection would have posed a grave risk to X in view of his/her underlying health conditions.

In view of these concerns, I therefore decided to base my assessment on existing documents and on the views of X’s carers and family/friends rather than visiting him/her in person.”

For the authorisation document:

“I note that the BIA decided not to assess X face to face in view of the risk of COVID-19 transmission. I agree that this is the best way of promoting X’s Article 5 rights whilst protecting him from serious illness. This authorisation will be reviewed when public health restrictions are lifted.”
